Sanding disc board with a handle for mounting 3 fi 150 mm sanders

A universal board intended for working with sanding discs in the NTools / APP series is an effective tool for organizing and arranging your work at the workshop.

Made from steel, the board may serve as a handy storage for sanding discs (whole boxes), as well as a hanger for individual discs without boxes. The board features 9 spaces for mounting discs, enabling to distinguish the most popular sand paper gradations in the given workshop. This allows to easily control the wear rate of sanding discs.

The board is additionally equipped with a powder coated steel handle used to mount 3 pneumatic sanders with the most popular on the disc diameter on the market of 150 mm. The handle may additionally be attached to the 40HMF-TAB modular board or directly to the wall using wall plugs and screws.

The functional board is available in a version to hang on the workshop wall. The board comes with an instruction manual and accessories essential to mounting the board and the handle (screws, wall plugs, disc mounts).
